

Series 300

Variable Speed Ultra Smooth Operation

Maintained Action Aluminum Base

1K - 150K OHM

250 mW

FEATURES

1. Durable aluminum base with formed steel cover.
2. Ultra smooth variable speed operation.
3. ½" NPTF connector hole standard for cable strain relief fittings. Other connector holes available on request.
4. No exterior springs! Torsion springs located inside the foot switch.
5. Four mounting slots.
6. Capable of handling up to 12/3 cable or .50" O.D.
7. 10 amp, SPDT long life snap switch available to operate at beginning or end of stroke.
8. Equipped with 2 watt potentiometer (customer to specify Ohm rating and taper, i.e., linear or logarithmic).
9. #8 grounding screw is provided.
10. Skid-resistant elastomeric base pad.
11. Buna-N O-Ring and Buna-N gasket seals.
12. Numerous cord strain reliefs available for your special requirements.

Maintained Action

Custom Foot Switches:

The Series 300 can be provided with special nameplates, cord sets, plugs, strain reliefs, and other features that may be required for specific applications.

BENEFITS

The Series 300 foot switch offers variable speed control for use with variable speed motor drives. The cover maintains its positions when the foot is taken off the switch. The cast aluminum base housing, painted black, provides high durability and corrosion protection at the base – where water tends to sit. Underneath the cover, a plated steel cover-plate adds additional ingress protection. With the addition of rubber gaskets and o-rings, this potentiometer control can provide environment protection. The foot switch can be provided with a SPDT switch to operate at the beginning or end of stroke
